

TLISS00224 Rail Operations Fundamentals Skill Set

Your introduction to train driving in the rail industry

Do you want to be a Train Driver or would you like to learn skills to find work in the Australian Rail Industry?

Are you looking for skills that will help you get a head start when applying for jobs in the rail sector?

The Rail Operations Fundamentals Skill Set (TLISS00224) is nationally recognised training and a great choice for people who want to work in the rail industry. It teaches participants how to safely access the rail corridor, follow important rail safety rules, and communicate and work well with others on the job, and can give you a head start on the qualifications required for train driving.

WHAT YOU GET FROM THIS COURSE

- A start to your career in the rail industry
- A great foundation for train driving or other yard, terminal or signaller roles
- Nationally recognised qualifications
- Skills to make you more valuable to recruiters

COURSE DELIVERY

Course delivery is a combination of self-paced online learning plus 3 days face-to-face classroom contact and practical training.

LOCATION

The classroom and practical training is delivered at Railtrain's Perth Airport training facilities.

Workshops will be scheduled to meet participant demand and minimum learner number requirements.

COURSE INFORMATION

The skill set covers vital competencies for the railway industry, including railway fundamentals, radio communication, risk assessments and other safety procedures, corridor access, fatigue management, and effective teamwork.

Participants who successfully complete this training will be well-equipped to excel in the dynamic and safety-conscious rail environment.

RAILTRAIN is a national Registered Training Organisation (RTO) that delivers training services exclusively for the rail industry.

Call (08) 9470 4999 or email training@railtrain.com.au to find out more information.
